

We're charity: water and we're working to end the water crisis.

WE'RE A NONPROFIT ON A MISSION TO BRING CLEAN AND SAFE DRINKING WATER TO PEOPLE IN DEVELOPING COUNTRIES.

With the help of hundreds of thousands of generous supporters, we've funded more than 16,000 water projects in 24 countries, bringing clean water to 5.2 million people so far.

And we're just getting started.

WHAT MAKES US UNIQUE?

100% of all public donations directly fund water project costs, we prove every project we build using photos and GPS coordinates on Google Maps, and we work with strong local implementing partners to build and maintain projects.

If you want to change everything, start with one thing.

Start with water.

There are **663 million people** on the planet who don't have access to life's most basic need. That's right, 663 million human beings—just like you and me—struggle to find water every single day.

When a community gets clean water, lots can change. It can improve health, decrease medical expenses, increase equality, give girls more time in school, and give women the chance to grow food or earn income.

When people don't have access to clean water, they drink disease-filled water instead. They don't have a choice. And how do they get it? They walk for it. Mostly, the job falls to women and children, who might walk up to four hours a day to collect dirty water. That's time they can't spend caring for their families, earning income, or learning in school.

Why did we choose to focus on water? Because we're on a mission to change everything. And we believe that changing everything starts with clean water.

We're working to end the water crisis, but we're not working alone.

We've worked with many incredible people and organizations over the years. These are just a few of them.
